

SAUNATECHNICS

Your Partner in Sauna Gasheating

The Classic Line

The sauna gas heater for the commercial market!

In the sauna world, the culture of experience is on the rise and is becoming increasingly popular both in the Netherlands and abroad. Cabins of more than 100 m² and more than 150 guests are a structural challenge not only for the sauna builders, but also for the operators, who have to manage the investment and the annual operating costs. Saunatechnics offers you the ideal solution with its Classic Line. You can buy a ready-made suit or have a suit custom made. Saunatechnics offers you both options with the Classic Line. The Classic Line is available from 24 kW upto 200 kW. With the Classic Line gas heaters you can save up to 70% in energy costs per year in the form of a standard solution and an individual solution customized to your wishes and requirements.

With the increasing size of the saunas and the number of saunas, the Classic Line heaters are becoming increasingly economical for you.

In addition, the residual heat can be used cost-effectively for, for example, the use of showers and floor heating.

Saunatechnics heaters not only stand out for their high cost-effectiveness, they also provide powerful Aufguss and are characterized by their effective heat storage. Another advantage is the decentralized, robust and low-maintenance technology.

The price and quality ratio of the Classic Line is favorable with its high quality. Most efficient and high-quality sauna gas heater on the market. Anywhere else cheaper we pay the difference.!

Your benefits:

- Up to 70% savings on operating costs compared to electric heaters
- The larger your system, the more profitable the Classic Line is
- High efficiency with its end tube or heat exchanger
- Timeless design
- Large amount of buffer stones very suitable for pouring on
- Mild sauna climate
- Reduced CO₂ pollution
- Low noise level
- No 380V power required for installation
- KIWA certified as a sauna heater
- Made in Holland 35 years of experience

One of the first sauna gas heaters was installed in 1980, which is still operational every day today.

We therefore say a sauna gas heater from SAUNATECHNICS is for LIFE!

We are happy to advise you on ways to operate your saunas cost-effectively..

Certified according to the Gas Equipment Regulation (EU) 2016/426. Certificate CE-0063CS3981

The Classic line is delivered:

- Spiral with adjustable stainless steel legs
- Steel jacket with adjustable stainless steel legs and stainless steel grid
- Double-walled stainless steel burner tube with safety console
- Steel end tube
- Stainless steel hose with 2 clamps
- Safety switch
- Sauna gas burner new model
- Classic line fan with temperature protection
- Professional saunacontrol
- Fire resistant wall duct
- Manual plus certificate

Characteristics:

Burner

Suitable for natural gas 24 - 30 kW per burner

Spiral

Steel tube EN 10219, length depending on the model 22 - 32 meter tube length, adjustable stainless steel feet

Burner tube

Double-walled stainless steel

Grid

Stainless steel

Ventilator

Low noise with temperature lock

Control

Professional with 2 sensors optional with turbo button
