

BLOOWY

Diffuser for "Perles de parfum"

OPERATION

Plug one end of the power chord into the designated space at the back of the device and the other into wall outlet,

Remove the lid by pulling up with the two hands,

Pour 2 or 3 pods of perfume pearls in each of the two designated trays, spreading them out evenly,

Replace the lid,

Turn on the diffuser by turning the two start buttons clockwise,

To start set both buttons at 50% (marking line up),

The setting of the diffusion should be adjusted to the environment: room volume, temperature, ventilation, humidity,

Whenever the fragrance intensity becomes insufficient, add two pods of perfume pearls "Perles de parfum" and so on,

Empty the tray when the pearls completely fill it and the fragrance loses its intensity, and repeat the process,

Achieve the desired fragrance intensity for any size room by adjusting the diffusion speed or the amount of perfume pearls added to the tray.

INSTRUCTIONS & CARE

RECOMMENDATIONS FOR USE

When new pearls are added, a certain amount of fragrance on the surface will be diffused more quickly. It is recommended to use a more slow diffusion setting at the beginning and then to adjust the speed afterwards if it's necessary.

The diffuser may have varying results depending on its placement in the room. The air flow of a room can in fact be used to optimize diffusion. (For example, avoid placing the diffuser under an air intake vent). It is recommended to try the diffuser in different locations in order to determine the best placement.

SPECIFICATIONS

Model	BLOWY
Power	7W
Power supply	24V 0.5A
Dimensions	(L)400mm x (W)200mm x (H)74mm
Net weight	1145g
Coverage	Up to 100m ²
Garantee	2 years from date of purchase CE,
Compliance	RoHS, FCC
Lighting	Blue LED during operation

PRECAUTIONS FOR USE

1. Do not use for any other purpose other than that described in this manual.
2. Ensure that the supply voltage is compatible with the product specifications.
3. Use only the power adapter provided with the product.
4. Do not place the device in contact with water or any other liquids.
5. Do not attempt to disassemble or repair the diffuser yourself.
6. This product is not suitable for people (including children) with reduced physical, sensorial or mental abilities as well as people who lack knowledge of the product, except under supervision or if they have received prior instructions from the person responsible for their safety.
7. Children must stay under parental supervision, so that they do not play with the appliance.
8. Protect the power cord against damage. If the external cable is damaged, it shall be replaced by a special cord or cord exclusively available from the manufacturer or its service agent.

INFORMATION

Camylle Laboratories have gained international notoriety with their specially developed fragrances for spa equipment in humid areas: sauna, steam bath, hydrotherapy, etc. Today the spa perfumer offers a revolutionary solution for diffusing natural fragrances that will make candles, perfume burners, incense sticks and other such health hazards, a thing of the past.

- Dry and healthy diffusion: Only molecules from natural perfumes and essential oils are diffused, without the use of chemicals, solvents, humidity or heat, therefore making it a solution free of toxic emissions,
- Convenient diffusion: Pour the recommended amount of pearls in the diffuser, turn it on, and the fragrance is released throughout the space for weeks at a time; no more steps are required,
- Employee-approved diffusion: Fragrances can be problematic for certain individuals, but this is often due to improper diffusion methods. The Bloowy diffuser maintains a perfectly balanced fragrance intensity, suitable for people,
- Economical diffusion: The Bloowy diffuser is sold at a very attractive price and can be installed in any space without requiring a significant investment,
- Aesthetic diffusion: The Bloowy diffuser fits well in any space thanks to its contemporary and elegant design.
